Re: Notification of Claimed Copyright Infringement Pursuant to 17 U.S.C. § 512

Dear GoDaddy,

My firm represents The Football Association Premier League Limited (“Premier League”), which owns copyrights in broadcasted Premier League football (soccer) matches, including the right to publicly perform those copyrighted works. Premier League has determined that users of GoDaddy’s services are infringing Premier League’s copyrighted works through the following websites and domain names:

GoDaddy is asked to remove or disable access to Premier League's copyrighted works, which, based on the infringement that has occurred to date through the websites and domain names identified above, will continue to be infringed in this same manner throughout the Premier League season. In addition, enclosed is a subpoena pursuant to 17 U.S.C. § 512(h) that instructs GoDaddy to provide Premier League with information sufficient to identify the alleged infringers that are associated with these websites and domain names, including those contained in the backend links.

We are providing this notice based on our good faith belief that the use of Premier League's matches in the manner occurring through the websites and domain names identified above is not authorized by Premier League, its agents, or the law. The information in this notification is accurate and, under penalty of perjury, we are authorized to act on behalf of Premier League, which owns exclusive rights under copyright that are being infringed in the manner described herein. This letter is without prejudice to the rights and remedies of Premier League, including to recover damages and any other claims for relief, all of which are expressly reserved.

Sincerely,

HAGAN NOLL & BOYLE, LLC

The image shows a Wireshark interface with a packet list on the left and a packet details pane on the right. The packet list shows a series of TLS-related packets between 192.168.2.13 and 223.5.5.5. The selected packet (No. 583) is a Client Hello from the client to the server. The details pane shows the structure of this packet, including the TLS Version (3.1), Random bytes, Session ID, Cipher Suites, Compression Methods, Extensions, and Supported Versions. The 'Extensions' field is expanded to show the SNI (Server Name Indication) extension with the value 'productapi.6868b.cc'.

The image shows a Wireshark network traffic analysis interface. The top toolbar includes various icons for file operations, search, and display filters. Below the toolbar is a display filter bar with the text "Apply a display filter ...". The main packet list pane shows a series of packets, with the following columns: No., Time, Source, Destination, Protocol, Length, and Info. The packets are primarily TLSv1.2 Application Data, with some Client Hello and Server Hello messages. One Client Hello message (packet 326) has the SNI field highlighted as "vpic.6868c.cc".

Venus 1.pcapng

Packets: 74043 · Displayed: 74043 (100.0%)

Profile: Default

The screenshot displays a Wireshark interface for a file named 'Venus 1.pcapng'. The main pane shows a list of network packets, primarily DNS traffic. The columns include No., Time, Source, Destination, Protocol, Length, and Info. The 'Info' column provides details for each packet, such as 'Standard query response' or 'Standard query' for various domains like 'ip-api.com', 'broker.00005555.cc', and 'tm1.hdtvvip.com'. The bottom pane shows a detailed view of a selected frame (Frame 48), including Ethernet II, Internet Protocol Version 4, User Datagram Protocol, and Domain Name System (query) details. The hex dump and ASCII representation of the frame data are also visible.
